Lecture – 108
Rotary and Winged Hybrid Airships

(Refer Slide Time: 00:15)

There are also some helicopter type rotorcrafts. So, this is an example of something called SkyHook heavy lift vehicle. They are trying to install the blades of the huge turbines.

(Refer Slide Time: 00:37)

Similarly, another one which has got 40 tons capacity. So their idea was that you can use it for construction activity at remote areas.

(Refer Slide Time: 00:51)

And then there is one very interesting concept where you put a wing on a balloon. So, let us see this. This is a company called Ohio Airships. **(Video Starts: 01:01)** We have plans for this future. Right now, they may be very small airship which can just carry one pilot. **(Video Ends: 02:45)**. So, again these are attempts by small entrepreneurs to try new concepts.
