Quiz

True or False: All Google Cloud Platform resources must be associated with a project.

- A. True
- B. False

You have reached the end of the module, complete the short quiz to test your understanding, true or false. All GCP resources must be associated with the project. The answer is true, associating all resources with the project helps with billing and isolation, which of the following is a command-line tool that is part of the cloud SDK C is the correct answer the gsutil command-line tool is used to work with cloud storage.

What command would you use to set up the default configuration of the cloud SDK. The g-cloud init command is used to set up the user default project and a default region and zone of the SDK.
