**Compute Options in the Cloud**

**(Refer Slide Time: 00:06)**

Let us begin by learning about computer options in the cloud. GCP offers a variety of computer services planning different usage options for General work load that require dedicated resources for applications computer engine is a good option. If you are looking for a platform-as-a-service app engine, it is a good option. Cloud functions offer a server less option for triggering code to run based on some kind of event.

And to run containers on a managed Kubernetes platform you can leverage Google Kubernetes engine. You will find out more about each of these Computer Services during this module.
