Lecture-32
No SQL Managed Services Options

(Refer Slide Time: 00:05)
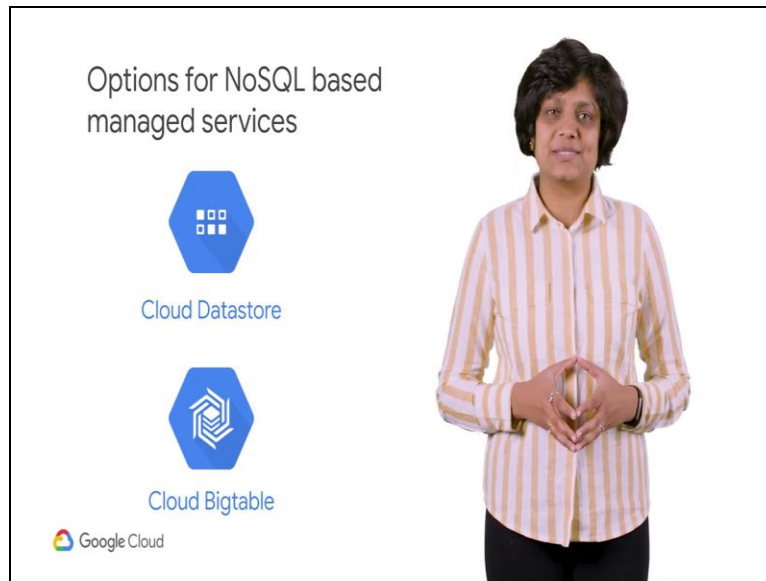

Now you will explore the no sequel managed service options currently available. Google offers two managed no sequel database options. The first one is cloud datastore this is a fully managed service no sequel document store that supports asset transactions. The second one is cloud BigTable this is a petabyte scale sparse wide column no sequel database that offers extremely low write latency these managed services are discussed in more detail in topics that follow
