Quiz

Which of the following services leverages the Apache Beam SDK to perform ETL operations on both batch and streaming data?

- A. Cloud Dataproc
- B. Cloud Dataflow
- C. BigQuery
- D. Cloud Bigtable

Now which of the following services leverages the Apache Beam SDK to perform ETL operations on both batch and streaming data how about this one? If you said cloud dataflow that is exactly right. It is a serverless managed data service that can perform ETL operations on both batch and streaming data using the Apache Beam SDK, nice work.
