5	15.a.	A 15-year-old teenager with sickle cell disease had been consuming foam rubber since he was around 6 years of age. He primarily chewed the rubber found from furniture, and mattresses, ironing-board pads. He was embarrassed by the behavior, but he was interested in stopping the behavior. Identity the disorder and Explain it's causal factors.	K5	CO4
	(OR)			
	15.b.	A 60-year-old, divorced Indian woman had multiple convictions of theft and several remand admissions. The acts of stealing were typically due to failure to resist the tension and strong urge to take the items without paying, and feeling satisfied after taking them. The items typically were of no use to her. She stated that the acts of shoplifting helped to lift her mood temporarily during the depressive episodes. However, she would later feel guilty, which subsided when she either threw away or gave the items to others. Identity the disorder and explain its causal factors.
