

PSG COLLEGE OF ARTS & SCIENCE
(AUTONOMOUS)

BCA DEGREE EXAMINATION DECEMBER 2025
(First Semester)

Branch – COMPUTER APPLICATIONS

STATISTICS FOR COMPUTER APPLICATIONS

Time: Three Hours

Maximum: 75 Marks

SECTION-A (10 Marks)

Answer ALL questions

ALL questions carry EQUAL marks

(10 × 1 = 10)

Question No.	Question	K Level	CO
1	The empirical relationship between Mean, Median, and Mode is given by which of the following formulas? (a) Mean = 3 Median – 2 Mode (b) Mode = 3 Median – 2 Mean (c) Median = 3 Mean – 2 Mode (d) Mean = Mode + Median	K1	CO1
2	The formula for population standard deviation is: (a) $\sigma = \sqrt{[\Sigma(x - \mu)^2 / N]}$ (b) $\sigma = \Sigma(x - \mu)^2 / N$ (c) $\sigma = \sqrt{[\Sigma(x - \bar{x})^2 / (n - 1)]}$ (d) $\sigma = \Sigma(x - \mu) / N$	K2	CO1
3	The formula for Spearman's Rank Correlation Coefficient (ρ) is: (a) $\rho = 1 - (6d^2)/(n^3 + n)$ (b) $\rho = 1 - (6d^2)/(n^3 - n)$ (c) $\rho = 1 - (6d^2)/(n(n^2 - 1))$ (d) $\rho = 1 - (6d)/(n^2)$	K1	CO2
4	In regression analysis, the square of the correlation coefficient (r^2) is known as: (a) Coefficient of variation (b) Coefficient of determination (c) Regression coefficient (d) Standard error	K2	CO2
5	A test is said to be one-tailed if: (a) The rejection region is on both sides of the sampling distribution (b) The rejection region is only on one side of the sampling distribution (c) The acceptance region lies outside the tails (d) The test is performed twice	K1	CO3
6	In large sample tests for difference between two means, the null hypothesis is usually stated as: (a) $H^0: \mu_1 - \mu_2 = 0$ (b) $H_0: \mu_1 + \mu_2 = 0$ (c) $H_0: \mu_1 - \mu_2 > 0$ (d) $H_0: \mu_1 = \sigma_2$	K2	CO3
7	The t-test for a single mean is generally used when: (a) Population standard deviation is known and sample size is large (b) Population standard deviation is unknown and sample size is small (c) Population mean is unknown and sample size is large (d) Both mean and standard deviation are known	K1	CO4
8	The F-test is primarily used to: (a) Test the equality of two means (b) Test the equality of two proportions (c) Test the equality of two variances (d) Test the equality of two medians	K2	CO4
9	The transportation problem in Operations Research deals with: (a) Minimizing the number of routes between two cities (b) Allocating resources from sources to destinations at minimum cost (c) Determining the shortest path in a network (d) Maximizing profit in an assignment problem	K1	CO5
10	The main purpose of PERT is to: (a) Determine the shortest route in a network (b) Plan, schedule, and control large projects with uncertain activity times (c) Allocate resources at minimum cost (d) Optimize inventory levels in production	K2	CO5

SECTION - B (35 Marks)

Answer ALL questions

ALL questions carry EQUAL Marks (5 × 7 = 35)

Question No.	Question	K Level	CO												
11.a.	The following table shows the distribution of marks obtained by 50 students in a statistics examination: <table border="1"> <tr> <th>Marks</th> <th>Frequency (f)</th> </tr> <tr> <td>0-10</td> <td>5</td> </tr> <tr> <td>10-20</td> <td>8</td> </tr> <tr> <td>20-30</td> <td>12</td> </tr> <tr> <td>30-40</td> <td>15</td> </tr> <tr> <td>40-50</td> <td>10</td> </tr> </table>	Marks	Frequency (f)	0-10	5	10-20	8	20-30	12	30-40	15	40-50	10	K2	CO1
