

PSG COLLEGE OF ARTS & SCIENCE
(AUTONOMOUS)
MCA DEGREE EXAMINATION MAY 2026
(Second Semester)
Branch – **COMPUTER APPLICATIONS**
MATHEMATICAL OPTIMIZATION

Time: Three Hours

Maximum: 75 Marks

SECTION-A (10 Marks)
Answer **ALL** questions
ALL questions carry **EQUAL** marks (10 × 1 = 10)

Question. No.	Question	K Level	CO
1	In the _____ form of the LPP, all the constraints are expressed as equations. (i) canonical (ii) standard (iii) feasible (iv) basic	K1	CO1
2	The optimal solution of a LPP in a graphical method lies at _____ of the feasible region. (i) center (ii) corner points (iii) origin (iv) None of the above	K2	CO2
3	Which algorithm is commonly used to solve an assignment problem? (i) Simplex Algorithm (ii) Vogel's Approximation Method (iii) Hungarian Algorithm (iv) North-West Corner Rule	K1	CO1
4	When solving an assignment problem, ensure that the _____. (i) all entries are non-zero (ii) all entries are zero (iii) at least one entry is non-zero (iv) number of rows = number of columns	K2	CO2
5	To balance an unbalanced transportation problem where demand exceeds supply, you must add a _____. (i) dummy destination (ii) dummy source (iii) slack variable (iv) surplus variable	K1	CO1
6	The degenerate transportation problem occurs when the basic feasible solution has fewer than _____ occupied cells (i) $m+n-1$ (ii) $m+n+1$ (iii) $m-n-1$ (iv) $m-n+1$	K2	CO2
7	The critical path is defined as the _____. (i) Shortest path through the network (ii) Path with the maximum float. (iii) Longest path through the network. (iv) Path with the minimum number of activities.	K1	CO1
8	A dummy activity in a network diagram is used to represent _____ between two activities without requiring any actual work, resources, or time. (i) dependency (ii) non-dependency (iii) independency (iv) none of the above	K2	CO2
9	Which technique is most suitable for routine, repetitive projects like construction? (i) PERT (ii) CPM (iii) Both (iv) None	K1	CO1
10	Float is the amount of time that a project activity can be _____ without affecting the overall project schedule. (i) stopped (ii) postponed (iii) delayed (iv) all of the above	K2	CO2

SECTION - B (35 Marks)
Answer **ALL** questions
ALL questions carry **EQUAL** Marks (5 × 7 = 35)

Q.No.	Question	K Level	CO
11.a.	Give the mathematical formulation of LPP.	K1	CO1
	(OR)		
11.b.	Solve using graphical method: Minimize $Z = 4x_1 + 2x_2$ subject to $x_1 + 2x_2 \leq 2$; $3x_1 + x_2 \leq 3$; $4x_1 + 3x_2 \leq 6$; $x_1, x_2 \geq 0$		

Cont...

12.a.	Solve the following assignment problem for maximization given the profit matrix (Profit in Rs.) <table><tr><td colspan="2" rowspan="2"></td><td colspan="4">MACHINE</td></tr><tr><td>1</td><td>2</td><td>3</td><td>4</td></tr><tr><td rowspan="4">JOB</td><td>A</td><td>16</td><td>10</td><td>14</td><td>11</td></tr><tr><td>B</td><td>14</td><td>11</td><td>15</td><td>15</td></tr><tr><td>C</td><td>15</td><td>15</td><td>13</td><td>12</td></tr><tr><td>D</td><td>13</td><td>12</td><td>14</td><td>15</td></tr></table>			MACHINE				1	2	3	4	JOB	A	16	10	14	11	B	14	11	15	15	C	15	15	13	12	D	13	12	14	15	K3	CO3

SECTION -C (30 Marks)

Answer ANY THREE questions

ALL questions carry EQUAL Marks

(3 × 10 = 30)

Q. No.	Question	K Level	CO																																																	
16	An advertising company wishes to plan its advertising strategy in four different cities. The purpose of advertising is to reach as large a number of potential customers as possible. Following data has been obtained from market survey: <table><tr><td></td><td>Chennai</td><td>Bangalore</td><td>Calcutta</td><td>Hyderabad</td></tr><tr><td>Cost of an advertising unit</td><td>Rs 30,000</td><td>Rs 20,000</td><td>Rs15,000</td><td>Rs10,000</td></tr><tr><td>No. of potential customers reached per unit</td><td>Rs2,00,000</td><td>Rs6,00,000</td><td>Rs1,50,000</td><td>Rs1,00,000</td></tr><tr><td>No. of female customers reached per unit</td><td>Rs1,50,000</td><td>Rs 4,00,000</td><td>Rs 70,000</td><td>Rs 50,000</td></tr></table> The company wants to spend no more than Rs.4, 00,000 on advertising. Following are the further requirements that must be met: i) At least 1million exposures take place among female customers. ii) Advertising in Calcutta and Hyderabad be limited to Rs.1, 50,000. iii) At least 3 advertising units be bought in Calcutta and 2 units in Hyderabad. iv) The number of advertising units in Chennai and Bangalore should each be between 5 and 10. Formulate an L.P. model for the problem.		Chennai	Bangalore	Calcutta	Hyderabad	Cost of an advertising unit	Rs 30,000	Rs 20,000	Rs15,000	Rs10,000	No. of potential customers reached per unit	Rs2,00,000	Rs6,00,000	Rs1,50,000	Rs1,00,000	No. of female customers reached per unit	Rs1,50,000	Rs 4,00,000	Rs 70,000	Rs 50,000	K4	CO4
