PSG COLLEGE OF ARTS & SCIENCE

(AUTONOMOUS)

MCom DEGREE EXAMINATION MAY 2022

(Fourth Semester)

Branch - COMMERCE

LOGISTICS AND SUPPLY CHAIN MANAGEMENT Maximum: 75 Marks

Answer ALL questions ALL questions carry EQUAL marks (10 x 1 = 10) 1. The concept of logistics has been systematically divided into (a) 2 phases (b) 3 phases (c) 4 phases (d) 5 phases 2. A supply chain is essentially a sequence of linked: (a) customer and prospects (b) supplier and manufacturer (c) suppliers and customers (d) warehousing and wholesaling units 3. The supply chain management philosophy emerged in which decade? (a) 1960s (b) 1970s (c) 1980s (d) 1990s 4. The number of stages that the goods and services flow through (a) Add to the complexity of SCM (b) Relaxes the complexity of SCM (c) Brings no change in complexity of SCM (d) Ensures better quality 5. Many organisations hold safety stocks as part of their inventory. Which of the following is a reason for holding safety stocks? (a) To improve stock holding levels (c) To cater for demand forecast errors (d) To cater for a large storage capacity 6. A supply chain is made up of a series of processes that involve an input, a, and an output. (a) Shipment (c) customer (b) Supplier (d) Transformation 7. When suppliers, distributors, and customers partner with each other to improve the performance of the entire system, they are participating in a, and (d) channel of distribution (e) supply chain (b) value delivery network (c) supply chain 8. A Supply chain process is viewed as (a) Birds eye view (b) Technical view (c) strategic view (c) strategic view (d) cyclic and push/pull view 9. The kind of warehouse that is licensed and authorized by the customs for storing goods till import duty is (a) Field warehouse (b) Buffer storage warehouse (c) Bonded warehouse (d) Export and import warehouse.	Time: Three Hours	Maximum. 13 Marks
(a) 2 phases (c) 4 phases (d) 5 phases 2. A supply chain is essentially a sequence of linked: (a) customer and prospects (b) supplier and manufacturer (c) suppliers and customers (d) warehousing and wholesaling units 3. A Supply chain process is viewed as (a) Birds eye view (b) Technical view (c) strategic view (d) cyclic and push/pull view 9. The kind of warehouse that is licensed and authorized by the customs for storing goods till import duty is (a) Field warehouse (b) Buffer storage warehouse (c) Bonded warehouse (d) Export and import warehouse.	2. A supply chain is essentially a sequence (a) customer and prospects (c) suppliers and customers	d) warehousing and wholesaling units
(a) Add to the complexity of SCM (c) Brings no change in complexity of SCM (d) Ensures better quality 5. Many organisations hold safety stocks as part of their inventory. Which of the following is a reason for holding safety stocks? (a) To improve stock holding levels (b) To improve stock accuracy levels (c) To cater for demand forecast errors (d) To cater for a large storage capacity 6. A supply chain is made up of a series of processes that involve an input, a, and an output. (a) Shipment (b) Supplier (c) customer (d) Transformation 7. When suppliers, distributors, and customers partner with each other to improve the performance of the entire system, they are participating in a (a) channel of distribution (b) value delivery network (c) supply chain (d) supply and demand chain 8. A Supply chain process is viewed as (a) Birds eye view (b) Technical view (c) strategic view (d) cyclic and push/pull view 9. The kind of warehouse that is licensed and authorized by the customs for storing goods till import duty is (a) Field warehouse (b) Buffer storage warehouse (c) Bonded warehouse (d) Export and import warehouse.	3. The supply chain management philoso (a) 1960s (c) 1980s	(d) 1990s
5. Many organisations hold safety stocks as part of their inventory. Which of the following is a reason for holding safety stocks? (a) To improve stock holding levels (b) To improve stock accuracy levels (c) To cater for demand forecast errors (d) To cater for a large storage capacity 6. A supply chain is made up of a series of processes that involve an input, a, and an output. (a) Shipment (b) Supplier (c) customer (d) Transformation 7. When suppliers, distributors, and customers partner with each other to improve the performance of the entire system, they are participating in a (a) channel of distribution (b) value delivery network (c) supply chain (d) supply and demand chain 8. A Supply chain process is viewed as (a) Birds eye view (b) Technical view (c) strategic view (d) cyclic and push/pull view 9. The kind of warehouse that is licensed and authorized by the customs for storing goods till import duty is (a) Field warehouse (b) Buffer storage warehouse (c) Bonded warehouse (d) Export and import warehouse. 10. Cross docking is the major SC technique used by (a) Flipkart (b) Wall mart	(a) Add to the complexity of SCM	f SCM (d) Ensures better quality
6. A supply chain is made up of a series of processes that involve an input, a, and an output. (a) Shipment (c) customer (d) Transformation 7. When suppliers, distributors, and customers partner with each other to improve the performance of the entire system, they are participating in a	5. Many organisations hold safety stock is a reason for holding safety stocks?	(b) To improve stock accuracy levels
6. A supply chain is made up of a series of processes that involve an input, a, and an output. (a) Shipment (b) Supplier (c) customer (d) Transformation 7. When suppliers, distributors, and customers partner with each other to improve the performance of the entire system, they are participating in a (a) channel of distribution (b) value delivery network (c) supply chain (d) supply and demand chain 8. A Supply chain process is viewed as (a) Birds eye view (b) Technical view (c) strategic view (d) cyclic and push/pull view 9. The kind of warehouse that is licensed and authorized by the customs for storing goods till import duty is (a) Field warehouse (b) Buffer storage warehouse (c) Bonded warehouse (d) Export and import warehouse. 10. Cross docking is the major SC technique used by (a) Flipkart (b) Wall mart	(c) To cater for demand forecast error	
performance of the entire system, they are participating in a (a) channel of distribution (b) value delivery network (c) supply chain 8. A Supply chain process is viewed as (a) Birds eye view (b) Technical view (c) strategic view (d) cyclic and push/pull view 9. The kind of warehouse that is licensed and authorized by the customs for storing goods till import duty is (a) Field warehouse (b) Buffer storage warehouse (c) Bonded warehouse (d) Export and import warehouse. 10. Cross docking is the major SC technique used by (a) Flipkart (d) Zoro	6. A supply chain is made up of a serie an output.(a) Shipment(c) customer	(b) Supplier (d) Transformation
(a) Birds eye view (b) Teethiteat View (c) strategic view (d) cyclic and push/pull view 9. The kind of warehouse that is licensed and authorized by the customs for storing goods till import duty is (a) Field warehouse (b) Buffer storage warehouse (c) Bonded warehouse (d) Export and import warehouse. 10. Cross docking is the major SC technique used by (a) Flipkart (b) Wall mart	performance of the entire system, the (a) channel of distribution	(b) value delivery network
9. The kind of warehouse that is licensed and authorized by the customs for storing goods till import duty is (a) Field warehouse (b) Buffer storage warehouse (c) Bonded warehouse (d) Export and import warehouse. 10. Cross docking is the major SC technique used by (a) Flipkart (b) Wall mart	(a) Birds eye view	(d) cyclic and push/pull view
10. Cross docking is the major SC technique used by (a) Flipkart (b) Wall mart	9. The kind of warehouse that is licen till import duty is(a) Field warehouse	(b) Buffer storage warehouse
	10. Cross docking is the major SC techn	(b) wall mare

SECTION - B (35 Marks)

Answer ALL Questions
ALL Questions Carry EQUAL Marks (5 x 7 = 35)

11. (a) Evaluate the functions of logistics operation.

Or

- (b) Show the major drivers of supply chain performance.
- 12. (a) Discuss the evolution of transportation and packaging.

(b) Explain the importance of effective transport system.

13. (a) Explain how to manage supply chain cycle inventory.

Or

- (b) Discuss the elements of inventory cost.
- 14. (a) Determine the important factors which influence network design decision.

Or

- (b) State the distribution network design.
- 15. (a) Explain briefly SCOR Model.

O

(b) Differentiate between inter functional and inter organizational supply chain management.

SECTION - C (30 Marks)

Answer any **THREE** Questions **ALL** Questions Carry **EQUAL** Marks (3 x 10 = 30)

- 16. Analyze the role of logistics and support in distribution channel with an example.
- 17. Determine the international transportation strategy.
- 18. Elucidate the various techniques on inventory management.
- 19. Predict factors influencing supply chain network decision.
- 20. Interpret the supply chain control process framework.
