

**PSG COLLEGE OF ARTS & SCIENCE**  
**(AUTONOMOUS)**

**MSc DEGREE EXAMINATION MAY 2022**  
(Fourth Semester)

**Branch – ENVIRONMENTAL SCIENCE**

**INDUSTRIAL PROCESS AND WASTE MANAGEMENT**

Time: Three Hours

Maximum: 75 Marks

**SECTION-A (10 Marks)**

Answer ALL questions

ALL questions carry EQUAL marks ( $10 \times 1 = 10$ )

1 \_\_\_\_\_ is the time after processing during which a dairy product normally remains suitable for human consumption.

- (i) Packaged date                          (ii) Shelf life  
(iii) Product code                            (iv) Product life

2 Which is the most commonly used dying fibre?

- (i) Rayon                                      (ii) Polyester  
(iii) Nylon                                     (iv) Viscose

3 \_\_\_\_\_ process is used to increase water resistance of paper.

- (i) Sizing                                      (ii) Stretching  
(iii) Filling                                    (iv) Sheeting

4 Dyeing process generates \_\_\_\_\_ wastewater.

- (i) Acidic                                      (ii) Alkaline  
(iii) Turbid                                     (iv) Coloured

5 \_\_\_\_\_ is the removal of calcium, magnesium and certain other metal cations in hard water.

- (i) Sedimentation                            (ii) Softening  
(iii) Disinfection                             (iv) Cleaning

6 The most common applications of chemical reduction is \_\_\_\_\_.

- (i) Cr (VI) to Cr (II)                        (ii) Cr (V) to Cr (III)  
(iii) Cr (VI) to Cr (III)                        (iv) Cr (V) to Cr (I)

7 Solvent used for dewaxing of petroleum products are \_\_\_\_\_.

- (i) Furfural                                    (ii) Methyl ethyl ketone  
(iii) Propane                                    (iv) Butane

8 India is a third largest producer of \_\_\_\_\_ fertilizers.

- (i) Potash based                              (ii) Nitrogen based  
(ii) Complex                                    (iv) Phosphorous based

9 Electroplating wastes can be treated as per \_\_\_\_\_ process.

- (i) Hydrolysis                                (ii) Neutralization  
(iii) Oxidation and reduction                (iv) Chemical precipitation

10 Operating principle of cyclone separator is based on the action of \_\_\_\_\_ dust particles.

- (i) Diffusion of                                (ii) Gravitational force on  
(iii) Electrostatic force on                    (iv) Centrifugal force on

**Cont...**

**SECTION - B (25 Marks)**

Answer ALL questions

ALL questions carry EQUAL Marks (5 x 5 = 25)

- 11 a What are the sources of waste generation in sugar industry?  
 OR  
 b Describe the characteristics of dairy industry wastewater.
- 12 a List out and explain various steps involving in the pulp preparation.  
 OR  
 b Illustrate the textile manufacturing process with flow chart.
- 13 a How tannery effluent affects receiving water bodies?  
 OR  
 b Discuss the role of surfactants in water pollution.
- 14 a Analyze the role of oil refineries on ambient air pollution.  
 OR  
 b Elucidate the nitrogenous fertilizer manufacturing process.
- 15 a "Electroplating is essential for increasing the shelf life of the product"  
 Justify.  
 OR  
 b Investigate the sources of waste generation in food processing industry.

**SECTION -C (40 Marks)**

Answer ALL questions

ALL questions carry EQUAL Marks (5 x 8 = 40)

- 16 a Justify the importance of anaerobic treatment in distillery waste management.  
 OR  
 b Determine the various stages of dairy processing.
- 17 a Investigate the characteristics and effects of dyeing effluents.  
 OR  
 b Describe the methods employed for paper and pulp effluents treatment.
- 18 a How plastic wastes affects the environment?  
 OR  
 b Evaluate the different tanning process with neat sketch.
- 19 a Explain mineral acid manufacturing process.  
 OR  
 b Discuss the significance of the oil refining process.
- 20 a Analyze the role of air pollution control devices in cement industry.  
 OR  
 b How to remove emerging contaminants from pharmaceutical industry effluents?
