

**PSG COLLEGE OF ARTS & SCIENCE
(AUTONOMOUS)**

**BSc DEGREE EXAMINATION MAY 2022
(Sixth Semester)**

Branch – BOTANY

GENETIC ENGINEERING

Time: Three Hours

Maximum: 75 Marks

SECTION-A (10 Marks)

Answer ALL questions

ALL questions carry EQUAL marks : (10 x 1 = 10)

- 1 Find the protein precipitating reagent used in DNA isolation is
 - (i) Lysosome
 - (ii) Ribonuclease
 - (iii) Phenol:Chloroform.
 - (iv) Proteinase K

- 2 Non-Radioactive labelling is done by labelling with
 - (i) End filling
 - (ii) Random Priming
 - (iii) horseradish peroxidase
 - (iv) None of the above

- 3 Name the λ cohesive ends
 - (i) cos site
 - (ii) sticky ends
 - (iii) Restriction site
 - (iv) MCS

- 4 Identify the process of preparing cell for DNA uptake
 - (i) Transformation
 - (ii) Transformation
 - (iii) Competent cell preparation
 - (iv) Transfection

- 5 Promotor region in the plasmid _____ the gene expression.
 - (i) induces
 - (ii) repress
 - (iii) is useless in
 - (iv) controls

- 6 The success of PCR reaction indicates the dependency of
 - (i) Primer designing
 - (ii) DNA Polymerase
 - (iii) Template concentration
 - (iv) All of the above

- 7 What are the two components of the functional β -gal?
 - (i) ω and α
 - (ii) μ and β
 - (iii) α and β
 - (iv) ω and β

- 8 State the use of *In vitro* translation
 - (i) creating mutation
 - (ii) gene product identification
 - (iii) protein kinetics studies
 - (iv) All of the above

- 9 Gene therapy refers to
 - (i) replacing disease causing genes
 - (ii) Introducing modified genes
 - (iii) only (i)
 - (iv) both (i) and (ii)

- 10 Choose from the following the nature of Covaxin vaccine.
 - (i) Live, attenuated
 - (ii) subunit
 - (iii) inactivated
 - (iv) conjugate

Cont...

SECTION - B (35 Marks)

Answer ALL Questions

ALL Questions Carry EQUAL Marks ($5 \times 7 = 35$)

- 11 a Explain the CTAB method for isolating plant genomic DNA.

OR

- b Analyse the labelling of DNA molecules.

- 12 a Outline different types of plasmids.

OR

- b Summarise the events of transfection.

- 13 a Explain briefly the construction of Genomic DNA library.

OR

- b What is cDNA synthesis? Write down the steps involved in it.

- 14 a Describe briefly about the Northern blot.

OR

- b Explain the procedure of *in vitro* translation.

- 15 a What is gene therapy? Discuss any two methods.

OR

- b What are transgenic plants? Explain how they are produced.

SECTION - C (30 Marks)

Answer any THREE Questions

ALL Questions Carry EQUAL Marks ($3 \times 10 = 30$)

- 16 Elucidate the steps in Genetic Engineering. Point out a few applications.

- 17 Highlight the features of λ phage.

- 18 Examine the screening of clones.

- 19 Discuss in detail 'Alpha Complementation' and its role in selecting clones.

- 20 Discuss in detail different types of vaccines and their production.

Z-Z-Z
